Quiet Gravity Emerald

38 mm · 18-karat yellow gold (development specification)

Design rendering

Quiet carries weight

Green on the vertical

Quiet Gravity Emerald places two upright emerald baguettes at twelve on a warm cream dial. A narrow interval separates them. The applied A.R. signature and the small-seconds register carry the same vertical line through the dial.

At 38 mm, the case gives the dial room around the central hands and hour indices. A black leather strap defines the outline of the yellow-gold case design, leaving the emerald pair as the sole colour accent on the dial.

The profile is drawn around a sculpted crown and an exhibition opening at the back. A micro-rotor movement is the development direction for this reference.

Reference details

Case diameter · 38 mm

Case gold · 18-karat yellow gold (development specification)

Gemstone · Two upright emerald baguettes

Strap · Black leather

Reference detail · Mechanical micro-rotor direction

Final movement, gemstone selection and availability are subject to confirmation.

Gemstone selection

Two natural emerald baguettes. Match face-up green, dimensions, outline, transparency and alignment as a pair. Reject dyed or coated stones. Declare and approve any reportable clarity enhancement before purchase.

Every finished gemstone must be individually identifiable on a GIA report. The watch or set will include the report or a complete copy for each stone.
